

Radioactive Material Findings for Fishery Products (announcement no. 166)

March 8, 2018

1 Test Results of Fishery Products

	Food tested	Area	Sampling date	Testing Institute	Results 【Radioactivity(Bq/kg)】	
					Cs-134	Cs-137
1	Brackish-water clam	Edogawa River downstream (Edogawa Ward)	Feb. 26, 2018	Marine Ecology Research Institute	ND(<4.6)	ND(<4.9)
2	Brackish-water clam	Tamagawa River downstream (Ota Ward)	Mar. 4, 2018		ND(<3.0)	ND(<3.5)

※ The guidance level for radioactive cesium in fishery products is 100Bq/kg for cesium-134 and cesium-137 combined (agricultural, forestry, and fishery products are categorized in the food group "general food products")

※ "ND" indicates that levels were less than the detection limit (minimum level able to be detected) in analyses conducted by the testing institutions. The figure in () is the detection limit.
