

Radioactive Material Findings for Fishery Products (announcement no.167)

March 22, 2018

1 Test Results of Fishery Products

Food tested	Area	Sampling date	Testing Institute	Results 【Radioactivity(Bq/kg)】	
				Cs-134	Cs-137
1 Coast flyingfish	Yaene fishery harbor (Hachijo Town)	Mar. 4, 2018	Marine Ecology Research Institute	ND(<3.9)	ND(<3.8)

※ The guidance level for radioactive cesium in fishery products is 100Bq/kg for cesium-134 and cesium-137 combined (agricultural, forestry, and fishery products are categorized in the food group "general food products")

※ "ND" indicates that levels were less than the detection limit (minimum level able to be detected) in analyses conducted by the testing institutions. The figure in () is the detection limit.
